

Toshiba A1304T Keypad Replacement

Written By: Christopher

INTRODUCTION

Use this guide to replace your Toshiba AT1304T keypad

TOOLS:

- [Flathead 3/32" or 2.5 mm Screwdriver](#) (1)
- [T8 Torx Security Bit Screwdriver](#) (1)

PARTS:

- [Toshiba A1304T Keypad](#) (1)
-

Step 1 — Back panel

- Using a thumb-tack, push-pin, or similar pin, remove the four plastic stoppers located on the back panel.

Step 2

- With the T8 Torx Security Bit Screwdriver, remove the four screws in the designated locations.
- ⓘ The T8 Torx Security Bit Screwdriver can be substituted with a small flathead screwdriver. Screw removal may be slightly more difficult however.

Step 3

- If needed, use the flathead screwdriver to gently pry the panel from the phone.
- Using your fingers, lift the panel from the device.

Step 4 — Keypad

- Use your fingers to detach the ribbon wire located on the top of the logic board, as shown.

Step 5

- Use a flathead screwdriver to gently pry the logic board and keypad from the device.

Step 6

- Peel the keypad from the logic board using your thumb.

To reassemble your device, follow these instructions in reverse order.
